

Introducing the D-280 HEPA vacuum cleaner

Specifically designed for contractors and cleaning professionals that require OSHA & EPA compliance

Model

D-280

- Meets mold, lead and asbestos safe certification programs
- Certified HEPA H13 grade that captures 99.97% of particles at 0.3 microns
- Low noise, only 69 dB
- Ideal for public buildings, hospitals, hotels, restaurants, and more.

DON'T COMPROMISE, GET THE BEST.

The new D-280 vacuum cleaner has everything you need for a safe clean-up and recovery of asbestos, lead, mold and other hazardous materials

Certified Filtering System

- The H-13 grade HEPA filter effectively retains toxic materials, maintaining a healthy work environment.
- Optional paper HEPA bags available for an easy disposal of debris. The use of a bag also helps to extend the life of the filter.

Heavy Duty Construction

- All metal 6 gallon tank and motor head design
- Powerful 1.25 HP Motor with 89" of waterlift
- Four heavy duty casters for easy transportation
- Full wrap non marking bumper guard protects walls and furniture

Easy to use

- Includes a full set of accessories for different tasks
- Low noise operation, only 68 dB
- Easy to transport and store because of its compact size

ACCESSORIES:

- 10' 1 1/4" heavy duty hose
- Crevice tool
- Dusting brush
- Adaptor
- Chromed expandable wand
- Upholstery tool with brush
- Carpet and floor tools
